

EDUCATIONAL PROJECTS

Montpelier Middle School

Montpelier, Vermont

Master plan and construction details for the renovation of the school grounds prominently located on Main Street in downtown. New features include: parking, entry plaza with granite benches and plants, student cultivated gardens, and a playground which supports activities including basketball, soccer, group and intimate socializing.

Collaboration with Gossens Bachman Architects.

The Putney School Field House

Putney, Vermont

Site design and construction details for a new outdoor courtyard and entry plaza built in association with the new net-zero Field House and the existing Student Union Building in the heart of the campus. The courtyard serves as a significant central congregating space for students and features stone seat walls, colorful permeable paver surfaces and planters. Phase 2 will consist of the study of existing conditions, including patterns of circulation and the function of landscape spaces on the entire campus. Then begin the master planning process by recommending general enhancements.

Collaboration with William Maclay Architects.

2010 AIA Honor Award for Excellence in Architecture.

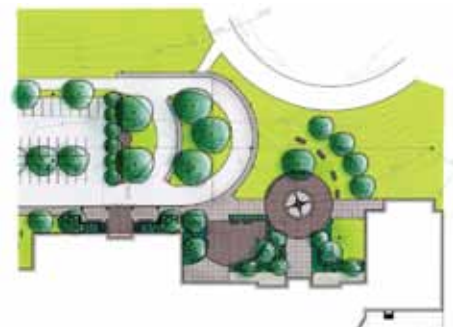

Stowe Middle and High School

Stowe, Vermont

Master plan and site design for an enhanced approach to the school. Created more functional car, bus and pedestrian circulation, welcoming entries, an inspirational courtyard for congregating, and a cohesive web of sidewalks, trees and lighting.

Collaboration with Black River Design Architects.

Vermont Law School

South Royalton, Vermont

Developed concepts for creating a clear and inviting gateway to campus that also expresses the school's environmental commitment. Ideas included more visible signage from the street, large entry plaza with benches and decorative pavers, defined pedestrian ways and colorful native plant rain gardens to absorb storm water run-off.

Arlington Memorial High School

Arlington, Vermont

Design for a circular outdoor classroom for music performances, receptions and student socializing. Local stone and native plants.

Collaboration with Black River Design.

Washington County Family Center

Berlin, Vermont

Site design for new Family Center. Collaborated with Black River Design Architects on locating new buildings, vehicular and pedestrian circulation, parking, playground and landscaping.
