LANDSCAPE DESIGN, INC

EDUCATIONAL PROJECTS

Montpelier Middle School

Montpelier, Vermont

Master plan and construction details for the renovation of the school grounds prominently located on Main Street in downtown. New features include: parking, entry plaza with granite benches and plants, student cultivated gardens, and a playground which supports activities including basketball, soccer, group and intimate socializing. Collaboration with Gossens Bachman Architects.

The Putney School

Putney, Vermont

Site design and construction details for a new outdoor courtyard and entry plaza built in association with the new Field House and the existing Student Union Building in the heart of the campus. The courtyard serves as a significant central congregating space for students and features stone seat walls, colorful permeable paver surfaces and planters. Phase 2 will consist of the study of existing conditions, including patterns of circulation and the function of landscape spaces on the entire campus. Then begin the master planning process by recommending general enhancements. Collaboration with William Maclay Architects.

Stowe Middle and High School

Stowe, Vermont

Master plan and site design for an enhanced approach to the school. Created more functional car, bus and pedestrian circulation, welcoming entries, an inspirational courtyard for congregating, and a cohesive web of sidewalks, trees and lighting. Collaboration with Black River Design Architects.

Washington County Family Center

Berlin, Vermont

Site design for new Family Center. Collaborated with Black River Design Architects on locating new buildings, vehicular and pedestrian circulation, parking, playground and landscaping.

Arlington Memorial High School

Arlington, Vermont

Design for a circular outdoor classroom for music performances, receptions and student socializing. Local stone and native plants. Collaboration with Black River Design.
