

SERVICES & FIRM PHILOSOPHY

SERVICES

Cynthia Knauf Landscape Design offers full landscape architecture services on all scales of residential, commercial, educational and public projects. We are experienced in team collaboration with the client, architect, civil and structural engineers, and other related disciplines on the project. Our designs are drafted in AutoCAD.

Landscape Architecture

- Analysis of Site Conditions
- Master Planning
- Site Development
- Concept Design
- Design Development
- Construction Documents
- Bidding and Negotiations
- Construction Administration
- Post Construction Follow-up

Planning

- Meeting Facilitation
- Vision Development
- Land Use Evaluation
- Master Planning
- Project Feasibility
- Construction Cost Projection

FIRM PHILOSOPHY

We believe in architecture that integrates the natural and man-made environments. Each of our landscapes is designed to be the thread which connects the:

Natural Landscape – its plants, soil and topography;

Clients – how they live, socialize and dream;

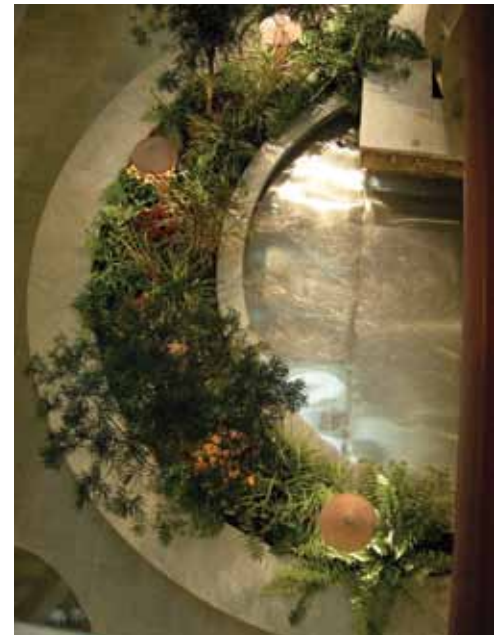

Buildings – their scale, style and materials,

Community – its history, culture and tradition.

We work with the existing site conditions to moderate indoor temperatures and outdoor climates, and to provide environmentally sensitive solutions for drainage and erosion concerns. Local construction materials are used to increase sustainability and provide harmony with the natural surroundings.
